

METEX

FOERSTER

METEX product family

METEX 4.250

The benefits

- **Pulse induction technology**
For large search depth
- **Highest sensitivity**
At the same time for small near surface as well as large deep objects
- **Suppression of small objects**
Due to adjustable delay
- **Tracking function**
For changing soil conditions

METEX 4.250

The benefits

- **Detection of any metal**
In soil or shallow water
- **Extremely robust**
Due to solid coil design
- **Optional wheel set**
For one man operation

METEX 4.250

Technical data

- **Dimensions coil**
1,055 x 1,055 x 67 mm (L x W x H)
- **Weight coil**
5.15 kg
- **Operation ambient temperature**
-25 °C to +60 °C
- **Operating time**
Up to 10 hours at 25 °C (+77°F)

The benefits

- **Pulse induction technology**
For large search depth
- **Highest sensitivity**
At the same time for small near surface as well as large deep objects
- **Suppression of small objects**
Due to adjustable delay
- **Tracking function**
For changing soil conditions
- **Detection of any metal**
In soil or shallow water
- **Demountable for easy transport**

Technical data

- **Dimensions coil**
Ø 1,360 mm, H 140 mm
- **Weight coil**
3.9 kg
- **Operation ambient temperature**
-25 °C to +60 °C (-77 °F to + 140 °F)
- **Operating time**
Up to 10 hours at 25 °C (+77 °F)
